

Year 4				
Working Scientifically				
<ul style="list-style-type: none"> •asking relevant questions and using different types of scientific enquiries to answer them •setting up simple practical enquiries, comparative and fair tests •making systematic and careful observations and, where appropriate, taking accurate measurements using standard units, using a range of equipment, including thermometers and data loggers •gathering, recording, classifying and presenting data in a variety of ways to help in answering questions •recording findings using simple scientific language, drawings, labelled diagrams, keys, bar charts, and tables •reporting on findings from enquiries, including oral and written explanations, displays or presentations of results and conclusions •using results to draw simple conclusions, make predictions for new values, suggest improvements and raise further questions •identifying differences, similarities or changes related to simple scientific ideas and processes •using straightforward scientific evidence to answer questions or to support their findings 				
Plants	Animals including Humans	States of Matter	Sounds	Electricity
<ul style="list-style-type: none"> •identify and describe the functions of different parts of flowering plants: roots, stem/trunk, leaves and flowers •explore the requirements of plants for life and growth (air, light, water, nutrients from soil, and room to grow) and how they vary from plant to plant •investigate the way in which water is transported within plants •explore the part that flowers play in the life cycle of flowering plants, including pollination, seed formation and seed dispersal. 	<ul style="list-style-type: none"> •describe the simple functions of the basic parts of the digestive system in humans •identify the different types of teeth in humans and their simple functions •construct and interpret a variety of food chains, identifying producers, predators and prey. 	<ul style="list-style-type: none"> •compare and group materials together, according to whether they are solids, liquids or gases •observe that some materials change state when they are heated or cooled, and measure or research the temperature at which this happens in degrees Celsius (°C) •identify the part played by evaporation and condensation in the water cycle and associate the rate of evaporation with temperature. 	<ul style="list-style-type: none"> •identify how sounds are made, associating some of them with something vibrating •recognise that vibrations from sounds travel through a medium to the ear •find patterns between the pitch of a sound and features of the object that produced it •find patterns between the volume of a sound and the strength of the vibrations that produced it •recognise that sounds get fainter as the distance from the sound source increases 	<ul style="list-style-type: none"> •identify common appliances that run on electricity •construct a simple series electrical circuit, identifying and naming its basic parts, including cells, wires, bulbs, switches and buzzers •identify whether or not a lamp will light in a simple series circuit, based on whether or not the lamp is part of a complete loop with a battery •recognise that a switch opens and closes a circuit and associate this with whether or not a lamp lights in a simple series circuit •recognise some common conductors and insulators, and associate metals with being good conductors.
