

# KEPS Expectations

Following COVID 19

## Returning to learning

We want our children to return to learning quickly and we will be supporting the transition through a carefully balanced curriculum.

We have 'Nurture sessions', 'Think Children', sensory time, new technology, extra staffing and many more procedures in place to rapidly accelerate learning following a long period of absence. All carried out carefully with the child's mental health at the forefront of our strategy.

*You can help by encouraging that 'love of reading'*

## Giving our KingEdwinners a boost

We all know that the children need a little boost forwards and with your help we can support this. We expect that all children will attend school and that no term time holidays are taken by families. We will offer many after school clubs and also deliver some learning recovery sessions during half term breaks.

Perhaps if parents can support by giving us 10% more support at home with daily reading and educational activities, we will be able to multiply the positive effect that is achieved.

Together, we hope that our children will be able to make up for lost time in a sensible and balanced approach that considers their well being and happiness as well as the academic opportunity that they all deserve.

At KEPS we *believe in learning , growing & achieving together...* there is no better time than now to show this as a community.

*Our school apps promote confidence with numbers*
