Excellence

Patterns are everywhere and they can help with mathematical concepts. Look out for patterns that you can see in nature. You may even wish to make a rubbing of the patterns you find! You could use a piece of paper and wax crayon, place it on the item and rub the crayon to make the pattern. Or take a photograph.

Respect

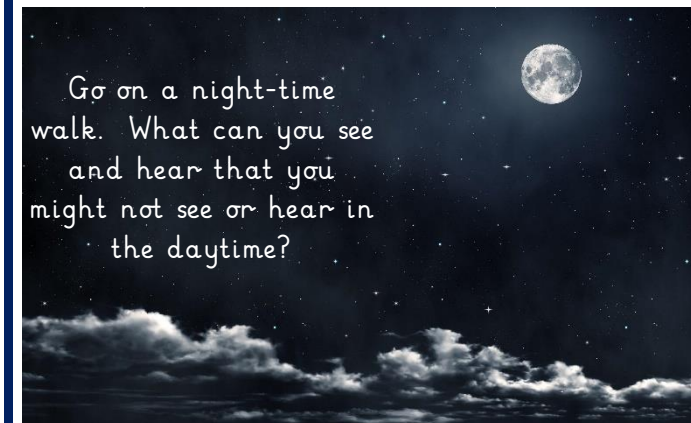

Go out and about on an adventure!

Look for changes in the environment and signs of autumn, including the changing of leaves and what you may find on the ground e.g. conkers, chestnuts, acorns.

Determination

Go on a night-time walk. What can you see and hear that you might not see or hear in the daytime?
