

King Edwin Primary School

Main Learning: Digestion & Teeth (Animals inc. Humans)

Year 4

Subject: Science - Biology

Key knowledge

Know exactly what happens to the food we eat

Know and name the parts of the digestive system

Know about the function of each organ of the digestive system

Know and identify the different types of teeth in humans

Know the function of different human teeth

Construct and use food chains to identify producers, predators and prey

Vocabulary

oesophagus

This is like a stretchy tube that moves food from the back of the throat to the stomach

pancreas

This produces juices called enzymes which help the body digest food

organ

The skin is the biggest organ of your body. Other organs include your brain, lungs, heart, liver, stomach, intestines, pancreas, and kidneys, all called internal organs

intestine

The small intestine absorbs nutrients and minerals from food. The large intestine absorbs water from the remaining indigestible food

molars

These are teeth that are used for chewing and grinding our food

canine

These are teeth used for ripping and tearing our food. We have two located at the top of our mouth and two at the bottom

SCIENCE

Prior Knowledge –
